## Technical Toolbox

Ruby // Rails // SQL // Jira // Vagrant  
Git // GitHub // APIs // Trello // Ajax

HTML5 // CSS3 // Sass // jQuery  
JavaScript // Bootstrap

## Work Experience

### Developer

April 2015 - present

Adwerx

Durham, NC

- Full stack Ruby on Rails, SaaS web development.
- Troubleshooting bugs and implementing fixes.
- Process design and documentation for Customer Success support.
- Agile development process with daily stand-ups and biweekly sprints.

### Rails Engineering

September - December 2014

The Iron Yard

Durham, NC

- Studied and wrote code 80-90 hours/week for three months.
- Learned to quickly launch functional prototypes.
- Built fast, production-quality, full-stack applications.
- Collaborated with two developers to design and deploy a web solution for ordering catered school lunches for my final project.

### Founder, Owner and Manager

December 2006 - June 2014

The Red Hen

Chapel Hill NC

- Founded an award-winning business with loyal staff and clientele.
- Developed and worked every aspect of the company including:
  - Purchasing, merchandising, accounting, and payroll.
  - Marketing, advertising, social media, and staff culture.
  - Designing and systemizing processes for efficiency.
- Contributed to building community through classes, events, and fundraisers for local non-profits.
